

NOW, FOR 53 FOOT TRUCKS...

THE HIGHWAY'S THE EASY WAY TO JFK

Newly authorized routes and newly built facilities are making life easier for truckers delivering or picking up cargo at JFK International Airport. New York City's DOT has authorized use of combination vehicles with industry-standard 53' trailers on an all interstate-highway routes direct to JFK.

And The Port Authority of New York and New Jersey has opened NYC's first truck stop at the airport, with food, fuel, and affordable truck parking for all types of trucks.

The new direct route to JFK's air cargo facilities provides access across the George Washington Bridge (I-95) from points west and south of New York City and via the New England Thruway (I-95) from points north and east. The route then connects to the Whitestone Bridge and onto the Van Wyck Expressway (I-678) directly into JFK.
